

LXF II-370×125

单头仿形铣床 Single Head Copy Router

[性能特点]

- 用于铝门窗幕墙型材的各类型孔、槽等的铣削加工。
- 本机结构简单紧凑、造型美观、体积小、重量轻、启动均采用气压控制。
- 靠模调整更换简单、快捷、效率高、操作安全。

[Product Features]

- It is used for processing several types of holes, grooves and water-slots on aluminum and PVC windows & doors or curtain walls.
- It has the features of compact structure, nice design, small volume and the air pressure controls the starting up of the motor.
- Easy replacement of the copy-routing plate, large work scope, high efficiency and convenient operation achieve the continuous processing and safety operation.

④ 技术参数 Technical Parameters

输入电压	Voltage	380V 50Hz
工作气压	Operation air pressure	0.5-0.8MPa
仿形范围	Copy-routing range	370×125mm
铣刀直径	Milling cutter diameter	φ12
